

Website Project Proposal

Kev's Café

"Great coffee, honest food, seamless online ordering."

Prepared for: WEDE5020 — Part 1 Assignment
Prepared by: Kevin Sbusiso Dlamini
Institution: Rosebank International (IIE)
Submission date: 14 August 2026

1. Organisation Overview

Name: Kev's Café

Brief History: Founded in 2022 in Springs, Gauteng, Kev's Café is a local artisanal coffee shop and eatery known for specialty coffees, freshly baked pastries, and gourmet lunch options. It operates as a single physical storefront serving the local community.

Mission Statement: To deliver high-quality artisanal coffee and fresh meals with unmatched convenience, quality, and warm hospitality.

Vision Statement: To become Springs' premier quick-order specialty café through direct digital engagement and a seamless online ordering experience.

Target Audience: Local office workers, college students, and nearby residents aged 18–45 seeking quick lunch pickups, specialty coffee, and online ordering options.

2. Website Goals and Objectives

- Specific Goals:**
- Enable direct online customer ordering for pickup to reduce peak-hour wait times.
 - Showcase daily menu items, seasonal specials, and dietary options clearly.
 - Facilitate quick customer communication via direct messaging tools.
 - Establish a modern digital presence to build local brand awareness.

Key Performance Indicators (KPIs):

KPI	Description	Target
Monthly Unique Visitors	Total distinct individuals visiting the website	600+ visitors within 6 months
Online Order Conversion	Percentage of visitors placing a pickup order	3.5% of total site traffic
Direct Customer Inquiries	Requests received via the integrated contact/chat channels	15+ per week

3. Current Website Analysis

- Strengths:**
- Strong local brand reputation and an active social media community.
 - Established loyal physical customer base in the local community.
- Weaknesses:**
- Absence of an official website leaves customers unable to view the current menu or pricing remotely.
 - High phone inquiry volume during peak hours creates operational bottlenecks.
- Areas for Improvement:**
- Develop a central digital hub featuring a dynamic product menu with real-time updates.

- Implement client-side interactive ordering (persistent shopping cart) and instant inquiry capabilities.

4. Proposed Website Features and Functionality

Homepage: Hero banner showcasing signature menu items, business hours, daily specials, and clear primary call-to-action (CTA) buttons.

About Us Page: Background history of Kev's Café, store values, mission statement, and core team highlights.

Products / Menu Page: Dynamic interactive product catalog with categories (Beverages, Pastries, Lunch), item detail views, and client-side shopping cart integration using browser local storage.

Enquiry & Contact Page: Store contact details, physical address, multiple embedded interactive location maps, business hours, an inquiry form with instant validation, and a floating WhatsApp chat button for direct messaging.

5. Design and User Experience

Colour Scheme:

- Primary: Dark Espresso Brown (#2C1A1D) — conveys rich coffee heritage.
- Secondary: Warm Cream (#F5EBE6) — provides clean background contrast.
- Accent: Amber Gold (#D4A373) — highlights call-to-action buttons and notifications.

Typography:

- Headings: Modern bold sans-serif font (Poppins / Aptos) for high readability.
- Body Text: Clean sans-serif font (Inter / Open Sans) set at a comfortable reading size.

Layout and Design:

- Mobile-first responsive grid layout designed for quick access on mobile devices.
- High-contrast visual structure emphasizing direct navigation to the menu and checkout button.

User Experience Considerations:

- Intuitive top-level navigation bar with active page indicators.
- Persistent shopping cart summary counter visible across all pages.
- Accessible colour combinations adhering to WCAG contrast standards.

Low-Fidelity Wireframe Structure:

- Header: Logo on left, navigation links on right, persistent cart icon badge.
- Hero Section: High-impact banner image overlaid with "Order Now" primary button.
- Body Grid: 3-column product grid with image, price, title, and "Add to Cart" button.
- Footer: Contact details, quick links, store hours, and social media icons.

See the wireframe diagram on the following page for the visual layout.

6. Technical Requirements

Hosting and Domain:

- Domain: Custom .co.za domain name (e.g., kevscafe.co.za).
- Hosting: Reliable local South African shared web hosting provider with SSL support.

Programming Languages & Frameworks:

- Semantic HTML5 for structural markup and accessibility.
- CSS3 (Flexbox & CSS Grid) for responsive design without external heavy frameworks.
- Pure JavaScript (DOM Manipulation & Web Storage API) for dynamic menu interactions and cart persistence.

7. Timeline and Milestones

Milestone	Phase / Activities	Timeframe
Milestone 1	Requirement Gathering, Wireframing & Project Proposal Submission	Weeks 1–2
Milestone 2	HTML5 Semantic Page Structure & Navigation Setup	Weeks 3–4
Milestone 3	Responsive CSS3 Styling & Layout Refinement	Weeks 5–7
Milestone 4	JavaScript Interactive Elements, Cart Storage & Validation	Weeks 8–10
Milestone 5	Testing, Domain Deployment & Final Portfolio Submission	Week 11

8. Budget

Category	Description	Estimated Cost (ZAR)
Domain Name	Annual .co.za domain registration	R150
Web Hosting	12-month shared Web Hosting package	R960
Development	Internal student development project	R0
Maintenance & Testing	Annual domain renewal & contingency	R300
Total		R1,410
